AULENBROCK, J. C. Cyclic Modes in Neural Net Models 505

BAIANU, ION. Abstract Representations of Biological Systems in Supercategories 59

BATEMAN, JOSEPH. A Tumor Cell Model for the Determination of Drug Schedules and Drug Effect in Tumor Reduction 637

BERT, JOEL L. Effect of Convective Flow on the Oxygen Tension Profile in the Cornea 569

BRYANT, EDWIN H. A Model of Population Fitness and the Maintenance of Genetic Polymorphism when Two Ecological Patches are Available . . 669

CAPOBIANCO, MICHAEL F. Tensor Products of Digraphs and the Structure of Groups of Pairs 319

CARPENTER, DONALD G. Biological Aging as a Diffusion Phenomenon . . 487

COMOROSAN, SORIN. Abstract Representations of Biological Systems in Supercategories 59

COMOROSAN, SORIN. A Quantum-Theoretic Approach to Enzyme Specificity: Proposals for a New Type of Biochemical Control Mechanism 623

CONROY, M. F. Estimation of Aortic Distensibility and Instantaneous Left Ventricular Volume in Living Man 93

COOKSEY, JACK C. The Partial Stream Sampling Assumption in Intestinal Perfusion Studies 307

COPE, FREEMAN W. Theory of the Effect of Externally Applied Voltage on Membrane Oxidation Kinetics 519

COPE, FREEMAN W. Ion and Water Transport Across Multicellular Membranes Through Extracellular Space by Chemiperistaltic Waves 529

COPE, FREEMAN W. Calculation and Measurement of Semiconduction Activation Energy and Electron Mobility in Cytochrome Oxidase, with Evidence that Charge Carriers are Polarons, which may Couple Oxidation to Phosphorylation 761

DALEY, D. J. Extinction Probabilities in Branching Processes: A Note on Holgate and Lakhani's Paper 35

DEAKIN, MICHAEL A. B. A Note on the Poiseuille-Type Flow of a Casson Fluid 71

DIEUDONNÉ, JEAN-MARIE. The Left Ventricle as Confocal Prolate Spheroids 433

DISTEFANO, JOSEPH J. Hypothalamic and Rate Feedback in the Thyroid Hormone Regulation System: An Hypothesis 233

FARRELL, R. A. On the Theory of the Spatial Organization of Macromolecules in Connective Tissue 727

FATT, IRVING. Effect of Convective Flow on the Oxygen Tension Profile in the Cornea 569
FATT, IRVING. Oxygen Diffusion in Large Single-Celled Organisms . . 327
FINDLER, NICHOLAS V. Computer Simulation of a Self-Preserving and Learning Organism 247
FREUDENSTEIN, F. Kinematics of the Human Knee Joint 215
GHISTA, DHANJOO N. The Time-Varying Elastic Properties of the Left Ventricular Muscle 75
GROSS, BENJAMIN. Oscillating Reactions in Open Systems 441
GUPTA, P. C. A Two Compartment Model for Cell Survival after Irradiation with Ionizing Radiation 1
GURPIDE, ERLIO. Interpretation of Tracer Data: Some Factors Which Reduce the Number of Terms in the Specific Activity Functions in n-Pool Systems 473
HART, R. W. On the Theory of the Spatial Organization of Macromolecules in Connective Tissue 727
HILDEBRANDT, J. Comparison of Mathematical Models for Cat Lung and Viscoelastic Balloon Derived by Laplace Transform Methods from Pressure-Volume Data 651
HILLS, B. A. Radial Bulk Diffusion into Heterogeneous Tissue 25
HOUGHTON, GERALD. A Lie Group Topology for Normal and Abnormal Human Behavior. 275
HUTCHINSON, GEORGE. Evaluation of Polymer Sequence Fragment Data Using Graph Theory 541
KAPPL, JOSEPH J. Conduction in Demyelinated Axons—A Simplified Model 9
KIM, YOUNG. Oscillating Reactions in Open Systems 441
KUZMA, JAN W. A Tumor Cell Model for the Determination of Drug Schedules and Drug Effect in Tumor Reduction 637
LANDAHL, HERBERT D. Some Conditions for Sustained Oscillations in Biochemical Chains with Feedback Inhibition 775
LIH, MARSHALL M. A Mathematical Model for the Axial Migration of Suspended Particles in Tube Flow 143
LOCK, G. S. H. Elastic Expulsion from a Long Tube 295
MANN, JONAH. Interpretation of Tracer Data: Some Factors Which Reduce the Number of Terms in the Specific Activity Functions in n-Pool Systems 473
MARIMONT, ROSALIND B. System Connectivity and Matrix Properties . . 255
MASSARO, THOMAS A. Oxygen Diffusion in Large Single-Celled Organisms . 327
McGavin, S. Letter to the Editor: The Strandedness of Nucleic Acids . . 797
MCKINZIE, WILEY R. Computer Simulation of a Self-Preserving and Learning Organism 247
MILLS, RICHARD A. Application of Mobilities in Electromagnetic Fields to the Determination of Kinetic Parameters 563
MODE, CHARLES J. Applications of Generalized Multi-Type Age-Dependent Branching Processes in Population Genetics 575
MURGOCI, P. A Quantum-Theoretic Approach to Enzyme Specificity: Proposals for a New Type of Biochemical Control Mechanism . . . 623

NAMEROW, NORMAN S. Conduction in Demyelinated Axons—A Simplified Model 9
NORWICH, K. H. Mathematical Models of the Kinetics of Glucose and Insulin in Plasma 105
NORWICH, K. H. Letter to the Editor: Neuroendocrine Control of Thyroid Secretion in Living Systems: A Feedback Control Mechanism 429
OFFNER, FRANKLIN F. Ionic Forces and Membrane Phenomena 359
RASHEVSKY, N. Outline of a Unified Approach to Physics, Biology and Sociology 159
RASHEVSKY, N. Some Consequences of Henri Poincaré's Hypothesis About the Biological Nature of the Three-Dimensionality of Our Space . . . 199
RASHEVSKY, N. A Contribution to the Mathematical Biology of Social Behavior: Comparison of Non-Violent Resistance and of Riots by Oppressed Groups 205
RASHEVSKY, N. A Note on the Mathematical Theory of the Effect of Nervous Stress on Coronary Thrombosis 403
RASHEVSKY, N. Multiple Relational Equilibria: Polymorphism, Metamorphosis and Other Possibly Similar Phenomena 417
RASHEVSKY, N. Mathematical Theory of Biological Periodicities II. Effect of Active Transport 591
RASHEVSKY, N. Some Considerations on Relational Equilibria 605
RASHEVSKY, N. Some Remarks on the Mathematical Bio-Sociology of the Relativity of Injustice 789
REILLY, KEVIN D. Models for the Pressing Rate Response of Rats and Pigeons on a Certain Class of Variable Interval Schedules of Behavior . 695
REILLY, KEVIN D. Models for Reserpine Effects on Normal and Brain-Operated Animals on a Continuous Reinforcement Bar Pressing Schedule . . 713
ROY, BHAKTA K. Analysis of the Exponential Decay Model of the Neuron Showing Frequency Threshold Effects 341
SINGER, ALVIN. Systems Engineering Analysis of Aortic Root Blood Pressure 453
SMITH, DAVID R. Analysis of the Exponential Decay Model of the Neuron Showing Frequency Threshold Effects 341
STRAUB, K. D. Calculation and Measurement of Semiconduction Activation Energy and Electron Mobility in Cytochrome Oxidase, with Evidence that Charge Carriers are Polarons, which may Couple Oxidation to Phosphorylation 761
VALAND, I. A Tumor Cell Model for the Determination of Drug Schedules and Drug Effect in Tumor Reduction 637
VAYO, H. WESTCOTT. The Time-Varying Elastic Properties of the Left Ventricular Muscle 75
VOUKYDIS, PANAGIOTIS C. Physiological Significance of the Geometrical Shape of the Left Ventricle: Course and Curvature of the Individual Myocardial Fibers 383
WEI, LING Y. Molecular Mechanisms of Nerve Excitation and Conduction . 39
WICKELGREN, WAYNE A. Learned Specification of Concept Neurons . . 123
WOO, L. S. Kinematics of the Human Knee Joint 215

WU, TAI TE. A Model for the Tertiary Structure of Transfer Ribonucleic Acids 395
ZIEN, TSE-FOU. Hydrodynamics of Bolus Flow. An Analytical Approach to Blood Flow in Capillaries 681

BOOK REVIEW

OESTREICHER, HANS L. and DARRELL R. MOORE, *Cybernetic Problems in Bionics.* (Reviewed by Robert Rosen) 619

INDEX TO VOLUME 31

INDEX TO SUBJECTS

Active Transport in biological periodicities, 591
Activity functions, specific, in n-pool systems, 473
Actomyosin, Na+-K+ activated, in chemiperistaltic waves, 529
Adequate design, 59
Age-dependent branching in population genetics, 575
Aging, biological, as a diffusion phenomenon, 487
Aorta,
  root blood pressure, 453
  distensibility and left ventricular volume, 93
Axons, demyelinated, conduction in, 9

Behavior
  human, 275
    social, riots and non-violent resistance, 205
      injustice, 789
  animal
    pressing-rate response of rats and pigeons, 695
      reserpine effects, 713
Biochemical
  chain oscillations sustained with feedback inhibition, 775
  control mechanism, 623
Biological
  nature of three-dimensionality of space, 199
  systems, abstract representations, quantum theoretic approach, 59
Biology, sociology, and physics unified, 159
Bionics, cybernetic problems in, 619
Bio-sociology of the relativity of injustice, 789
Birefringence in squid axon, 39
Blood
  flow in capillaries, 681
  pressure, aortic root, 453
  see also, tube, fluid
Brain-operated animals, bar pressing, 695
Branching processes in population genetics, 575

Capillary blood flow, 681
Categories, abstract, in biology, 59
Charge carriers as polarons, 761
Chemiperistaltic waves, 529
Computer simulation, self-preserving and learning organism, 247
Concept neurons, learned specification, 123
Conduction
  in demyelinated axons, 9
  nerve excitation, 39
Connective tissue, macromolecules, 727
Connectivity of systems and matrix properties, 255
Convective flow, effect on oxygen tension profile in the cornea, 569
Cornea, effect of convective flow on the oxygen tension profile, 569
Coronary thrombosis and nervous stress, 403
  see also, myocardial fibers, left ventricle
Cytochrome oxidase, semiconduction activation energy and electron mobility, 761

Decay model of the neuron, 341
Demyelination of axons, conduction, 9
Diffusion
  in aging, 487
  oxygen, in large single-celled organisms, 327
  radial, heterogeneous tissue, 25
Digraphs and tensor products, 319
Dimension, three, biological nature, 199
Dipoles at the membrane interface, 39

Electromagnetism, mobilities and kinetic parameters, 563
Electron mobility in cytochrome oxidase, 761

Enzyme specificity, quantum-theoretic approach, 623
Equilibria, relational, 417, 605
Expulsion, elastic, from a long tube, 295
Extinction probabilities in branching processes, 35

Flow, tube, migration of suspended particles, 143
Fluid, Casson, Poiseuille-type flow, 71

Genetic polymorphism and population fitness, 669
Glucose kinetics and insulin in plasma, 105
Graph
  theory and polymer sequence fragment data, 541
  matrix associations, 255
Group topology and human behavior, 275
Groups of pairs, structure of, 319

Heat production and absorption in excited nerves, 39
Human behavior, Lie group topology, 275
Hydrodynamics of Bolus Flow,
  see also, tube
Hypothalamic and rate feedback in the thyroid hormone regulation system, 233

Injustice, 789
Insulin and glucose kinetics in plasma, 105
Intestinal perfusion studies and partial stream sampling, 307
Ion and water transport across multicellular membranes, 529
Ionic forces and membrane phenomena, 359
Isotopes in specific activity of a pool, 473

Knee-joint kinematics, 215

Learned specification of concept neurons, 123
Learning organism simulation, 247
Left ventricle
  as confocal prolate spheroids, 433
  geometrical shape and individual myocardial fibers, 383
  time-varying elastic properties, 75
  volume in living man, 93
Lie group topology for human behavior, 275
Lung, cat, pressure-volume data, 651

Macromolecules, spatial organization in connective tissue, 727
Matrix properties and system connectivity, 255
Membrane
  interface and dipole behavior, 39
  oxidation kinetics, 519
  phenomena and ionic forces, 359
  transport of ions and water across, 529
Memory mechanism, field-dipole interaction during RNA synthesis in nerve cells, 39
Metamorphosis, 417
  biological and sociological, 605
Migration, axial, of suspended particles in tube flow, 143
Mobilities in electromagnetic fields, 563
Molecular mechanisms of nerve excitation and conduction, 39
Myocardial fibers, course and curvature, 383

Na+-Ka+ activated ATPase in chemiperistaltic waves, 529
Nerve
  conduction in demyelinated axons, 9
  molecular mechanisms of excitation and conduction, 39
Nervous stress and coronary thrombosis, 403
Neural net models, cyclic modes, 505
Neuroendocrine control of thyroid secretion, 429
Neuron
  decay model, 341
  concept, learned specification, 123
Neuroses, mathematically classified, 275
Non-violent resistance and riots, 205
Nucleic acids, evaluation of polymer sequence fragment data, 541

Organismic sets
  stability of equilibria, 417, 605
  unifying physics, biology, and sociology, 159
  see also, categories
Oscillations
  in enzymic behavior, 623
  in enzymic systems, 59
  sustained
    in biochemical chains with feedback inhibition, 775
    and transport in biological periodicities, 591
  reactions in open systems, 441
Oxidation and phosphorylation, 761

Oxygen
diffusion in large single-celled organisms, 327
tension profile in the cornea, 569

Pairs, groups of, 319
Perfusion, intestinal, 307
Periodicities, effect of active transport, 591
Personality disorders mathematically classified, 275
Phosphorylation and oxidation, 761
Physics, biology, and sociology unified, 159
Poincaré's three-dimensionality of our space, 199
Poiseuille-type flow of Casson fluid, 71
Polarons, 761
Polymer sequence fragment data using graph theory, 541
Polymorphism, 417
biological and sociological, 605
genetic, 669
Population
fitness and genetic polymorphism, 669
genetics, 575
Pressing-rate response of rats and pigeons on variable-interval schedules, 695
Prothesis, knee-joint, 215
Psychoses, mathematically classified, 275

Radiation, ionizing, and cell survival, 1
Reactor systems and oscillation, 441
Relational biology
supercategories, 59
see also, organismic sets
Relational equilibria, 417, 605
Reserpine effects on animals, 713
Ribonucleic acids
tertiary structure, 395
synthesis in nerve cells, memory, 39
Riots and non-violent resistance by oppressed groups, 205

Single-celled organisms, oxygen diffusion, 327
Self-preservation and learning simulated, 247
Social behavior, non-violent resistance and riots, 205
Sociology, physics and biology unified, 159
Specification, learned, concept neurons, 123
Squid axon, birefringence, 39
Stream sampling, intestinal perfusion, 307
Stress and coronary thrombosis, 403
Supercategories in biology, 59
Survival of cells after irradiation, 1
Suspended particles in tube flow, axial migration, 143
Synapse, adjustment of strengths, 505
System connectivity and matrix properties, 255

Tensor products of digraphs, 319
Tissue, connective, macromolecules in, 727
Thrombosis, coronary, and nervous stress, 403
Thyroid
hormone regulation system, 233
secretion and neuroendocrine control, 429
Topology for human behavior, 275
Tracer data interpretation in specific activity functions, 473
Transfer RNA, tertiary structure, 395
Transport
active, in biological periodicities, 591
ions and water across membranes, 529
Tube
elastic expulsion from, 295
flow, suspended particles, axial migration, 143
see also Blood, Capillary
Tumor reduction and drugs, 637

Unification of physics, biology, and sociology, 159
Uptake
as bulk diffusion, 25
oxygen, 327

Voltage effect on membrane oxidation, 519
Violence, 205

Water and ion transport across multicellular membranes, 529
